**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2, 4-6, 8-15, 17, 19, 21-25, 31, 33-37, drawn to radio equipment detail, classified in class 455, subclass 550.1.
- II. Claims 26-28, 30, drawn to a short range and a long range communication, classified in class 455, subclass 41.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as radio equipment operation more than one operation system class 552.1. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
